

## Capitaline AWS

Capitaline AWS covers financial and other information on over 72,707 Indian companies, including listed and unlisted companies. It provides historical financial data for 15-20 years, and annual reports are available for the last five years. It does not cover global companies.

### **Coverage:**

- Total Indian Companies: 72707
- Private Companies: 65315
- Total Industries : 322

Capitaline AWS has main 5 different modules:

**a) Company** – Information available like annual financials, interim results, corporate announcements, Share price data, etc.

**b) Industry** – It covers industry aggregate data like annual financials, interim results also news, and sector report or trend.

**c) House** – It provides business house or group level information like annual financials, interim results, and news.

**d) Peerset** – Peerset is nothing but your list of companies or portfolios you want to track by analyzing financial performance and price performance.

**e) Screener or Query module** – The screener module helps search companies based on different parameters.

**Downloads:** There is no limit in the downloading of data.
